

Graphic Organizer: Do the primary source almanacs match John Demos' text description of American almanacs?

Date of Almanac \_\_\_\_\_

What scientific information is printed in the almanac? (lunar, weather, astrological, ...) Is there any printed religious information?	Is there handwriting in the almanac? Is it on almanac page or a separate page?	What is the handwritten information mostly about? Was it personal or business/environment related?	What interesting details did you find to help make inferences about the person's lifestyle and/or personal life?

Do you have any unanswered questions? Write them on the back of this paper.
